### Warwick Castle

On 31<sup>st</sup> May, we re-installed a fantastic rock crystal chandelier back in to the State Dining Room of Warwick Castle following a thorough clean and electrification of the historic chandelier.

George IV, Edward VII, Queen Victoria and Prince Albert all dined here and this room continues to be used for impressive dinner parties and weddings.

Follow this link to our website to read more details about the restoration:

### Cracks in glass

Although we are able to remove chips from glass quite successfully, there is no machine that we are able to use to remove cracks from glass. However there is a method in which we can drill a small pin hole at the end of a crack to prevent it from running any further (see faint red circles in image to right). This option is often used on sentimental pieces so that the item can still be displayed or in some cases used without the risk that it may crack further and break into pieces. – [repairs@wilkinson-plc.com](mailto:repairs@wilkinson-plc.com)
