Restoration

This month we have a lot of re pinning going on at Wilkinson's, all part of restoration projects we have coming up and are very excited about. Our extensive collection of old patterns, moulds and large stock of pieces, allows us to replace or recreate any item that is missing or broken. In addition we can undertake a multitude of requests from re-pinning or rewiring.

Irish Mirrors

Here is one of our latest completions for a private client. We manufactured a pair of Irish mirrors, each mirror has a 5 branch mirror light with hand blown English lead crystal pieces, hand cut and polished in our own workshops, solid brass metalwork, all hand cut drops and buttons. The mirrors also have green and white overlay and gold leaf tiles surrounding the mirror to give it that final stand out detail.

Take a look at this great short video made by the Historic Royal Palaces, It shows the 18th century replica chandeliers that Wilkinson's had the pleasure of wiring and installing at Kensington Palace. This video shows all of the skill and time that went into reproducing these stunning chandeliers.
